## About Me

Backend and full-stack developer focused on building scalable web applications, workflow automation platforms, and AI-powered systems. Experienced with Python, Django, React, PostgreSQL, Redis, Celery, and LLM integrations.

## Career Objective

Seeking Backend Developer, Python Developer, or Full-Stack Developer roles where I can contribute to building reliable, high-performance systems while continuing to deepen my expertise in system design and AI applications.

## Technical Skills

- Languages: Python, JavaScript, SQL, HTML, CSS
- Backend: Django, Django REST Framework, Celery
- Frontend: React
- Databases: PostgreSQL, Redis
- AI & Automation: LLM integrations, RAG systems, asynchronous workflows
- Tools: Git, Docker, Swagger/OpenAPI

## Professional Experience

### Python Full-Stack Developer Intern – Bridgeon Skillversity

June 2026 – Present

- Developing and maintaining full-stack web applications using Django and React.
- Designing RESTful APIs with Django REST Framework.
- Working with PostgreSQL and Redis for scalable data management.
- Collaborating on feature development, debugging, and code reviews.
- Implementing authentication, role-based access control, and asynchronous tasks.

## Featured Projects

- Synthetix OS – AI-powered autonomous workflow orchestration platform featuring agents, RAG pipelines, asynchronous processing, and LLM integrations.
- Full E-commerce Application – End-to-end platform with authentication, product management, order processing, and payment workflows.

## Education

Bachelor of Arts in Political Science

University of Calicut – Graduating in 2026
